University of South Carolina - Columbia

Columbia, SC 11/2024

Bachelor of Computer Science

Relevant Experience

Computing in the Modern World
08-12/2024
- Completed various different projects learning new skills and tricks.
- Worked with peers to network and tackle different challenges.
- Used HTML to create a website with various features such as videos, photos, and more.

Intro to Computer Architecture
08-12/2024
- Learned various new coding languages including C and MIPS/MARS.
- Developed an understanding of how the hardware interacts with the machine.
- Used C and MIPS/MARS to code a program that adds two numbers and implements AND,OR,NOR and various other calculations.

Algorithmic Design 1
01-06/2024
- Learned java coding language developed skills quickly and implemented them into various projects.
- Worked with peers to solve issues in code and worked towards a common goal.
- Used java to make various projects such as a cannon game,calculator,age predictor and more.

Skills
- Programming languages: Java,Python,HTML,C,MIPS/MARS.
- Familiar with GitHub and various other collaboration tools.
- Soft skills such as problem solving, team work, communication
